Clinical Summary (Writer Agent Output)

Patient Overview

Ignacio Dach is an 86-year-old male with a history of LUNG. The patient is currently under monitoring for treatment response and potential toxicity.

Recent Clinical Status

Based on the most recent laboratory values from master records:

- **Renal Function:** Creatinine and eGFR levels should be monitored closely given the patient's age.
- **Hematology:** Blood counts (Hemoglobin, WBC) are being tracked for signs of myelosuppression.

Recommendations

- Continue standard surveillance protocols.
- Monitor for signs of fatigue or respiratory distress (Lung Cancer specific).
- Next scheduled review to assess symptom burden and medication adherence.
